For Immediate Release:

IRONSHORE PHARMACEUTICALS TO PRESENT DATA AT THE 6TH WORLD CONGRESS ON ADHD

George Town, Cayman Islands, April 19, 2017—Ironshore Pharmaceuticals & Development, Inc. (“Ironshore”), a wholly owned subsidiary of Highland Therapeutics Inc., today announced that it will be presenting clinical data for its investigational drug candidate HLD200 (delayed-release and extended-release methylphenidate), as well as rating-scale validation work at the 6th World Congress on ADHD (Attention-Deficit / Hyperactivity Disorder), being held in Vancouver, British Columbia from April 20-23, 2017.

“We are delighted to be sharing pivotal trial data and validation work we have conducted in support of two important functional rating scales: the Before School Functioning Questionnaire, or BSFQ, and the Parent Rating of Evening and Morning Behavior – Revised, or PREMB-R, at the World Congress on ADHD,” said Dr. Randy Sallee, Chief Medical Officer. “Our caregiver survey data, which will also be shared at the conference, support the fact that significant unmet medical needs exist in the treatment of ADHD. Ironshore invites all healthcare professionals attending the World Congress on ADHD to visit with us to learn more about the exciting work we are doing.”

Details of Ironshore’s poster sessions are below:

Guided Poster Tour Session P-16: Pharmacological treatment children and adolescents I

Friday, April 21, 2017, 2:30pm to 4pm PDT

Poster #: 010

Efficacy and safety of HLD200, a novel delayed-release and extended-release methylphenidate formulation, in children with Attention-Deficit/Hyperactivity Disorder: Results from a pivotal phase 3 trial

Poster #: 011

Dose proportionality and effect of food on the pharmacokinetics of HLD200, a novel delayed-release and extended-release methylphenidate formulation in healthy adults
